

Issue 20

What is on Issue 20?

- 5 Full Length Music selections in Flyer Format
- 79 Moving Backdrops and Animations in JPEG format

How do I use the Music?

Copy the music to your Flyer Audio drive and use in any project. These files will not play from the cd.

How do I use the JPEG Moving Backdrops?

If you have a Flyer use the Moving Backdrops provided on the other cd's that are in Flyer format. They are all the same backdrops.

These JPEG files are mainly provided for those that need them and know what to do with them. They are in a format that will load directly in Lightwave 4.0 (or above) as sequential image maps. From there they can be converted into any format you wish. Some PC programs support JPEG streams as well.

Issue 22

What is on Issue 22?

- 30 Moving Backdrops and Animations in Flyer format

How do I use the Moving Backdrops?

Using Files/Files or your favorite disk utility program (such as Disk Master) copy the Moving Backdrop you want to use to a flyer drive.

Most of the Moving Backdrops are loopable. This means you can butt two or more clips together without being able to tell visually when played back. To do this you must drag the clip up to the project and then go to the Control Panel and drag the in/out points as far out as they will go. Now clone the clip as many times as you want for a seamless loop.

This CD contains a little less than half of the Moving Backdrops provided on Issues 1-24. The rest are provided on Issue 21.

One final note on Issue 22. Somehow the Volume was inadvertently named Issue 24. This however has no affect on the content.
